Blood Glucose Lab Value

This lab test measures the amount of circulating blood glucose or blood sugar concentration. The body regulates blood glucose levels as part of metabolic homeostasis. The normal fasting blood glucose is typically between 70-100 mg/dL.

PLAY PICMONIC

70-100 mg/dL

70's guy to 100 Dollar-bill

This is the normal fasting blood glucose, which is less than 100mg/dL.
