

Harsh Sounding

Topic Definition The scene can take place in front of an ant hill. There's a disco ant with disco ball, clothes, and singing disco into mic. On the ground around him are raccoon's writhing in pain from the sound and plugging their ears. In front of the hill the other ants are on strike for him to leave, and are yelling into loudspeakers. One of them is ringing a dinner bell for them to come have hot cocoa, but one of the raccoon's is kicking it over and it's spilling onto a phone and visible action lines are coming out to rep. the harsh sounds it's making, maybe making another raccoon nearby plug ears.

CREATIVE AUDIO

There are two things this **disco ant** loves. Singing disco and shakin' his booty. Can you dig it? These **strike ants** don't. They're on strike because they hate the sound of disco and they want their ant hill back. They've been doing everything they can to drown out the disco by yelling **angry sound waves** from a megaphone. All communications broke down when they threw their phone into cocoa. But the **cocoa phone** kept on with the groovy tunes. A nearby ant had all he could take. He sounded the **dinner triangle** alarm and launched a barrage of **rockets**. And that's how disco died.
