

Age 3 Years - Developmental Milestones

By 3 years of age, children are usually able to ride a tricycle and are able to climb stairs with alternating feet as opposed to one step at a time. Three years olds are also able to stack a tower of 9 blocks and typically begin to toilet train although girls may begin this process earlier than boys. By 3 years of age, most children can also say sentences of 3 words and knows how to say their first name. At this age, children also begin to dress and undress themselves and can also copy a circle.

PLAY PICMONIC

Gross Motor

Walks Up/Down Steps with Alternating Feet

[Stairs with Alternating Feet](#)

Three-year-old children are typically able to climb stairs with alternating feet. Note that this is different than climbing stairs one at a time, which most two-year-old children are able to do.
